

HLCT250

HLCT250

The HLCT 250 is a fast-landing craft tank equipped with fore and side ramps, offering versatile payload capabilities (250t) and beaching capacity.

Typical payloads of up to 250 tons can be accommodated, comprising military vehicles, armored personnel carriers, or containers. The craft's flat, reinforced deck ensures efficient loading and unloading, while the wide beam provides stability even under heavy loads. The HLCT 250 is a highly adaptable solution for a variety of logistics and amphibious assault operations. In addition, the vessel features a flight deck capable of supporting day and night helicopter and Vertical Replenishment (VERTREP) operations. The flight deck is sized to accommodate up to two helicopters, further enhancing operational flexibility. The vessel is also equipped with two interceptor RHIBs, deployed via a dedicated aft ramp system, providing rapid-response and force protection capabilities.

MAIN CHARACTERISTICS

- Length Overall 100.4 m
- Beam Overall 15.7 m
- Maximum speed 16 kn
- Range at 16 kn 2150 NM
- Crew 29
- Hull & Superstructure Steel
- Classification Bureau Veritas

MISSIONS

- Amphibious operations. Carry heavy payloads at sea and roll off loads
- Sea Policing and maritime Security
- Logistics Support
- Helicopter Operations
- Humanitarian Relief
- Search and Rescue (SAR)
- Joint military operations and on-board Training
- UAV Operations
